Professional Summary

IT professional with hands-on experience in system administration, automation engineering, and technical support across enterprise environments. Skilled in Python scripting for security automation and data auditing, with a strong foundation in troubleshooting, endpoint management, and process improvement. Seeking to leverage technical expertise and analytical skills in an IT Security or Cybersecurity role.

Technical Skills

Languages:	Python, Bash/Shell Scripting, C++, Java, JavaScript, SQL, HTML, CSS
Tools & Platforms:	Linux (Ubuntu/KALI), Windows Server, Git, MySQL, VS Code, VIM, IntelliJ IDEA
IT & Security:	Endpoint Management, Mobile Device Management (iOS), Data Auditing, Automation Scripting, Troubleshooting, Help Desk Support (Tier 1-4)

Professional Experience

IT Support Technician / Automation Engineer September 2023 – Present
Mashburn Transportation Services *Bakersfield, CA*

- Deliver Tier 1-4 technical support for 100+ endpoints, resolving hardware, software, and network issues while maintaining 95%+ first-call resolution rate
- Develop Python automation scripts for data auditing and integrity verification, identifying discrepancies across multiple data sources and improving compliance monitoring
- Engineer workflow automation solutions using Python, reducing manual processing time by 40% across finance and operations departments
- Configure, deploy, and manage enterprise endpoints including Windows workstations and iOS mobile devices (iPhones/iPads)
- Install, configure, and troubleshoot proprietary and third-party software while maintaining security best practices

Technical Projects

FasterFishing – Python-based Deck Analysis Tool *Python, Multithreading, Pillows, APIs*

- Developing a comprehensive application to assist and automate Magic: the Gathering deckbuilding processes
- Integrated external APIs to fetch card data, images, and community tags for automatic deck categorization
- Designed an interactive GUI for deck import, visualization, and statistical analysis
- Optimized performance using multithreading to keep the interface responsive during simulations and API calls

Progressive Web Application *JavaScript, Firebase, Firestore*

- Led development of a PWA with secure Firebase authentication and Firestore database integration
- Implemented service workers for offline functionality and secure data caching

Education

Bachelor of Science in Computer Science – Information Systems December 2022
California State University, Bakersfield *Bakersfield, CA*
