Bakersfield, CA - Open to Relocation | (661) 330-6855 | clwomack2000@gmail.com | ceedubuyh.github.io

SUMMARY

IT professional with 3 years as one of two IT staff for a 100+ user transportation company, covering identity and access, email administration, mobile device management, endpoint deployment, network troubleshooting, and infrastructure maintenance. Strong Python automation skills, with a track record of spotting manual processes and replacing them with reliable scripted pipelines.

TECHNICAL SKILLS

Systems & Identity: Active Directory, Group Policy, Microsoft Exchange, Windows Server

Endpoint & MDM: Windows, IBM MaaS360, Linux, iOS/iPadOS

Networking: TCP/IP, DNS, DHCP, VPN, Wi-Fi, LAN, structured cabling

Scripting & Development: Python, PowerShell, Bash, SQL, React, TypeScript, FastAPI

PROFESSIONAL EXPERIENCE

IT Support Technician

Sept 2023 – Present

Mashburn Transportation Services

Bakersfield, CA

- Support 100+ users and endpoints; handle day-to-day IT operations independently and initiate and pitch improvement projects
- Administer IBM MaaS360 end to end for the company's iOS fleet: designed and maintain device configuration and security policies, manage enrollment, and enforce compliance
- Manage Active Directory user lifecycle, including onboarding and offboarding, and account and password management
- Manage the company's relationship with Granite Telecommunications for cellular, VoIP, and gate access services: add and remove lines, troubleshoot issues, and coordinate outage resolution
- Perform Exchange administration for company-wide email and apply updates to Windows Servers hosting business applications
- Engineered a Python pipeline to automate extraction, cleaning, and validation of source data before integration into the master dataset, cutting a daily reconciliation task from 30 min–2 hrs to under 5 min
- Leading a data initiative that uses California's Hazardous Waste Tracking System (HWTS) records to identify prospective customers for the company's waste disposal services
- Troubleshoot network connectivity across TCP/IP, DNS, DHCP, Wi-Fi, VPN, and LAN; ran and terminated Ethernet cabling
- Manage hardware lifecycle for 100+ Windows and iOS devices, from procurement and configuration to deployment and replacement, while maintaining a 95%+ first-contact resolution rate
- Write and maintain technical documentation and procedures for recurring issues and processes

TECHNICAL PROJECTS

Stacklab – Full-Stack Simulation Platform for Magic: The Gathering *Python, FastAPI, React, TypeScript*

- Architected a ~20,000-line Python simulation engine with a FastAPI backend and React/TypeScript frontend that models thousands of scenarios and visualizes engine decisions step by step
- Ensured correctness and reproducibility through deterministic seeding, regression testing, and validation against a formal rule specification

EDUCATION

B.S. Computer Science – Information Systems

California State University, Bakersfield

December 2022
